## Abstract

In relating to explain the scientific basis of triple rlung, mkhris, badgan theory of Tibetan Traditional Medicine among many researchers have been prevailed the opinions as if rlung, mkhris, badgan are living things, which really existed inside human body.

It should be say that rlung, mkhris, badgan could not be perceived by the human sense organs , they are things of **abstract thought** .

In this connection it is raised the principal question that what things are really existed inside human body, conditioning the appearance of triple rlung, mkhris, badgan theory of Tibetan Traditional Medicine .

The Existence of life is strongly dependent on the presence of protons and electrons, which were formed during an event called the big bang, 15 billion years ago. That is, the protons and electrons, which were formed during this event, set the stage for the formation of life in the universe.

The historical process of transition of life from the simple membrane-based mechanism for making ATP had converted to a more complex membrane - redox potential, a three state line system for making ATP during last 3,6 billion years.

In this connection should be say that triple Rlung, Mkhri, Badgan theory of Traditional medicine strongly connected with the really existing morpho - functional unit such as the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton conductance, which set the stage for the formation of life in the universe.

**Keywords:** triple Rlung, Mkhri, Badgan theory of Traditional medicine, the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton conductance.

## Introduction

In relating to explain the scientific basis of triple rlung, mkhri, badgan theory of Tibetan Traditional Medicine among many researchers have been prevailed the opinions as if rlung, mkhri, badgan are living things, which really existed inside human body.

It should be say that rlung, mkhri, badgan could not be perceived by the human sense organs , they are things of **abstract thought** .

In this connection it is raised the principal question that what things are really existed inside human body, conditioning the appearance of triple rlung, mkhri, badgan theory of Tibetan Traditional Medicine .

The Existence of life is strongly dependent on the presence of protons and electrons, which were formed during an event called the big bang, 15 billion years ago. That is, the protons and electrons, which were formed during this event, set the stage for the formation of life in the universe.

The historical process of transition of life from the simple membrane-based mechanism for making ATP had converted to a more complex membrane - redox potential, a three state line system for making ATP during last 3,6 billion years.

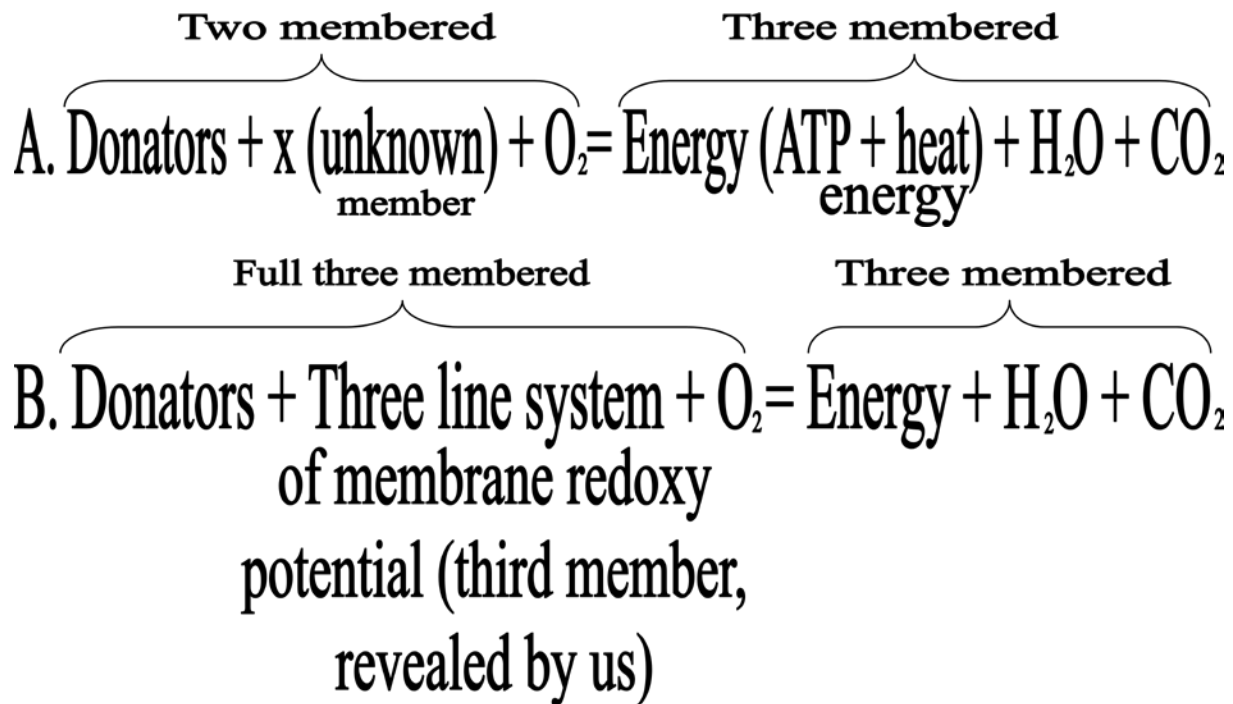

In this connection should be say that triple Rlung, Mkhri, Badgan theory of Traditional medicine strongly connected with the really existing morpho - functional unit such as the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton conductance, which set the stage for the formation of life in the universe.

## Results and discussion

By our suggestions, one of really existing things inside human body are the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside human body ,implemented in all systems as 4 compartments and 10 functional systems comprising all 14 trillion cells.

If we would accept the opinions of some researchers about existing the really living rlung, mkhris, badgan inside human body it mean that we should recognize the idea about existence of Homo sapiens human species, whose body beside living cells, contained a really existing living rlung, mkhris, badgan and who may be described as “Homo sapiens ,containing rlung, mkhris, badgan” human species.

By proposing the new idea about existence of the membrane - redox potentials three - state line system dependent - full 9 stepped cycle of proton conductance inside the human body we are categorically resisted, refused the opinions about the coexistence of “Homo sapiens plus rlung, mkhris, badgan”, “Homo sapiens plus vata, kapha, pitta” human species i.e. human species, containing a really living rlung, mkhris, badgan, yin, yan who are not registered in Linnaean taxonomy along with “Homo sapiens” human species.

**Figure 1. The membrane -redoxy potential three state line system between donators and acceptors inside the living cells.**

**By us established that:**

1. Fluid alpha state of the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton conductance inside human body consisting of unsaturated fatty acids with high levels of oxy potentials conducting the flow of protons and electrons are associated with abstract theory of Mkhris of Traditional medicine (TM), which is distinguished by hot, hot oil, acute external characteristics.

2. Solid beta state of the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton inside human body consisting of mainly saturated fatty acids conditioning a high levels of red potentials conducting the flow of protons and electrons are associated with abstract theory of Badgan of TM, which is distinguished by cool, cold oil, stupid external characteristics.

3. Gamma state of the membrane - redox potential, a three state line system dependent -full 9 stepped cycle of proton conductance inside human body consisting of decreased contents of saturated - unsaturated fatty acids, conditioning a decreased levels of redoxy potentials conducting the flow of protons and electrons are associated with abstract theory of Rlung of TM, which is distinguished by light, mobile, nonoil, cool external characteristics.

In such way if in the membrane - redoxy potential three state line systems enzyme substrate positioned between donators and acceptors in the left side of the full three membered equation of metabolic reaction as "Carbohydrate, amino acids, fatty acids + the membrane - redoxy potentials 3 state line systems +  $6O_2 = \text{energy (AT}\Phi, \text{ heat energy) + } 6H_2O + 6CO_2$ " has been prevailed alpha state with high oxygen potentials has been created a preconditions to generate the oxidized form of metabolites and drugs, which in Traditional medicine expressed as hot oil medicaments and hot oil external characteristics of Mkhris .

Also if in the membrane - redoxy potential three state line systems enzyme substrate positioned between donators and acceptors in the left side of the full three membered equation of metabolic reaction as "Carbohydrate, amino acids, fatty acids + the membrane - redoxy potentials 3 state line systems +  $6O_2 = \text{energy (AT}\Phi, \text{ heat energy) + } 6H_2O + 6CO_2$ " has been prevailed betta state with high red potentials has been created a preconditions to generate the reduced form of metabolites and drugs, which in Traditional medicine expressed as cool oil medicaments and cool oil external characteristics of Badgan .

Meanwile if in the membrane - redoxy potential three state line systems enzyme substrate positioned between donators and acceptors in the left side of the full three membered equation of metabolic reaction as "Carbohydrate, amino acids, fatty acids + the membrane - redoxy potentials 3 state line systems +  $6O_2 = \text{energy (AT}\Phi, \text{ heat energy) + } 6H_2O + 6CO_2$ " has been prevailed gamma state with low redoxy potentials has been created a preconditions to reduce generate both the reduced and oxidized forms of metabolites and drugs, which in Traditional medicine expressed as non oil medicaments and dry, mobile, less oil external characteristics of rLung .
